

Tentative Chapters Outline for “Programming with Go”

- Bhim P. Upadhyaya

1. Sample Programs
2. Packaging and Tooling
 - a. Naming Conventions
 - b. Declaring
 - c. Importing
 - d. Program Initialization and Execution
 - i. Package Initialization
 - ii. Program Execution
 - e. The Go Tool
3. Fundamental Building Blocks
 - a. Foundational Elements
 - i. Characters
 - ii. Letters and Digits
 - b. Lexical Elements
 - i. Literals
 1. Integer Literals
 2. Floating Point Literals
 3. Imaginary Literals
 4. Rune Literals
 5. String Literals
 6. Composite Literals
 7. Function Literals
 - ii. Identifiers
 - a. Blank
 - b. Predeclared
 - c. Exported
 - iii. Keywords
 - iv. Other Lexical Elements
 1. Comments
 2. Tokens
 3. Semicolon
 4. Operators
 - a. Arithmetic Operators
 - b. Comparison Operators
 - c. Logical Operators
 - d. Address Operators
 - e. Receive Operators
 5. Punctuation

- c. Types
 - i. Boolean Types
 - ii. Numeric Types
 - iii. String Types
 - iv. Array Types
 - v. Slice Types
 - vi. Struct Types
 - vii. Pointer Types
 - viii. Function Types
 - ix. Interface Types
 - x. Map Types
 - xi. Channel Types
- d. Constants
- e. Variables
- f. Blocks
- g. Declarations, Definitions, and Scope
- h. Expressions
 - i. Primary Expressions
 - ii. Method Expressions
 - iii. Index Expressions
 - iv. Slice Expressions
 - v. Order of Evaluation
- 4. Control Structures and Statements
 - a. If Statements
 - b. Switch Statements
 - c. For Statements
 - d. Go Statements
 - e. Select Statements
 - f. Goto Statements
 - g. Return
 - h. Break
 - i. Continue
 - j. Fallthrough
 - k. Defer
 - l. Other Statements
 - i. Empty Statements
 - ii. Terminating Statements
 - iii. Labeled Statements
 - iv. Expression Statements
 - v. Send Statements
 - vi. IncDec Statements
 - vii. Assignment Statements
- 5. Data Input and Output
 - a. Single Character Input

- b. Single Character Output
 - c. Reading From a File
 - d. Writing to a File
 - e. Navigating Directories
- 6. Functions
 - a. Function Declarations and Definitions
 - b. Multiple Return Values
 - c. Function Values
 - d. Anonymous Functions
 - e. Deferred Function Calls
 - f. Panic and Recover
 - g. Recursion
- 7. Some Built-in Functions
 - a. Close
 - b. Length and Capacity
 - c. Allocation
 - d. Array Processing
 - i. Make
 - ii. Append
 - iii. Copy
 - e. Map Processing
 - f. Bootstrapping
- 8. Methods
 - a. Method Declarations and Definitions
 - b. Pointer Receiver
 - c. Type Composition
 - d. Encapsulation
- 9. Interfaces
 - a. Interfaces as Types
 - b. Interfaces as Contracts
 - c. Contracts Fulfillment
 - d. Type Assertions
 - e. Type Switches
- 10. Basic Elements of Computing, Performance, and Scalability
 - a. Processing
 - b. Memory
 - c. Storage
 - d. Networking
- 11. Concurrency and Concurrency Patterns
 - a. Goroutines
 - b. Race Conditions and Detection
 - c. Locking Shared Resources
 - d. Mutual Exclusion

- e. Memory Synchronization
 - f. Goroutines and Threads
 - g. Channels
 - i. Unbuffered Channels
 - ii. Buffered Channels
 - h. Multiplexing
 - i. Concurrency Patterns
 - i. Runner
 - ii. Pooling
 - iii. Work
12. Unit Testing
- a. Tool
 - b. Functions
 - c. Profiling
13. Capability Extension
- a. Libraries
 - b. Accessing C Code
